

Citizens' Demand for a Carbon Tax in Canada

Recognizing that carbon taxes must be an important part of any realistic climate change action plan for Canada,

We call on the Government of Canada to bring in a tough, increasing, carbon tax, to be revenue neutral, i.e., with offsetting tax measures particularly to ensure that lower income Canadians are not disadvantaged;

We further call for the Government of Canada to encourage and facilitate the institution of carbon taxes at other levels of government.

(Signature, name and address /postal code are required to be a valid petition)
